

ARYAN PRAKASH

Software Engineer (.NET, React)

Email GitHub Autorovers Portfolio LinkedIn

Education

BMS College of Engineering

Bachelor of Engineering

2021 – 2025

CGPA: 6.8

Baldwin Academy

2018 – 2020

Class 12th

73.2%

Gyan Niketan School

2017 – 2018

Class 10th

89.2%

Experience

PKZEE LLC

Jul 2025 – Present

Software Engineer

- Built and tested a full-stack coaching platform using ASP.NET Core and React + TypeScript, contributing across backend APIs and frontend flows
- Designed and implemented Playwright-based end-to-end and API test suites, reducing manual testing effort and improving release confidence
- Structured scalable test architecture using Page Object Model (POM), improving maintainability and reducing flaky test behavior
- Collaborated with developers to debug API and UI issues using request/response validation and system-level tracing

Blinkit

Mar 2025 – Jun 2025

Senior Executive (Operations & Analytics)

- Built a Python-based analytics tool to process IoT incident data across 22 stores and identify recurring malfunction patterns
- Analyzed failure trends using time-based aggregation to detect recurring breakdown periods
- Generated operational reports highlighting high-risk stores and peak failure intervals
- Enabled proactive maintenance planning through actionable insights from incident data

Projects

Autorovers | .NET 8, ASP.NET Core, SQL Server, EF Core, React, TypeScript, JWT

2024 – Present

- Built a production-ready vehicle catalog platform with public UI and secure admin dashboard
- Designed REST APIs with JWT authentication supporting full CRUD workflows and role-based access
- Built React + TypeScript admin panel with real-time API integration
- Modeled scalable domain architecture using EF Core and SQL Server

Multi-Tenant Project Management System | Python, Django, GraphQL, PostgreSQL, React, TypeScript

- Built a multi-tenant SaaS-style system with strict data isolation using organization-based request scoping
- Implemented tenant resolution via middleware and enforced access control across GraphQL queries and mutations
- Developed project and task management features with real-time statistics and completion rate calculations
- Designed frontend with React + Apollo Client enabling dynamic tenant switching and cache synchronization

Pipeline Builder | React, ReactFlow, Zustand, Python (FastAPI)

- Built a visual pipeline builder with drag-and-drop nodes and real-time graph editing using ReactFlow
- Implemented dynamic node behavior including variable parsing and reusable component abstractions
- Integrated backend validation for DAG structure and cycle detection in pipeline graphs

Achievements

- Won 1st position at department level for major project “**Child Rescue Equipment from Borewells**”
- Project secured Runner-Up position at the Fluid Power Society of India (FPSI) project competition
- Served as Department and Stall Coordinator at Phase Shift 2023, BMSCE, leading volunteer teams during technical exhibitions
- Contributed 80+ volunteer hours across digital literacy, public health, reforestation, waste management, and water management

Certifications

- Git & GitHub Bootcamp
- HackerRank SQL (Basic, Intermediate, Advanced)
- C# Basics, C# Intermediate: Classes & OOP, and C# Advanced Topics

Technical Skills

Languages: C#, TypeScript, JavaScript, Python, SQL

Backend: ASP.NET Core, .NET 8, EF Core, REST APIs, JWT Authentication

Frontend: React, TypeScript, Vite

Testing: Playwright, Selenium

Databases: SQL Server, PostgreSQL

Tools: Azure DevOps, Git, GitHub Actions, SSMS
